## **New Installations of the Nova-65 in the Gulf of Mexico**

Since 1954, Tideland Signal has been committed to providing the most reliable, durable and maintenance free products for the marine industry. This past year Tideland introduced the most revolutionary LED lantern known to the industry.

The Nova 65 has recently been installed on several oil platforms in the Gulf of Mexico. Some units were wired for hard line synchronization, while others decided to go with the GPS synchronization.

We recognize the harsh environments that our products have to perform in and the Gulf of Mexico is known for its powerful, long lasting hurricane season. Unlike the traditional lanterns, the Nova 65 is light and compact yet extremely rugged. Please see our "Extreme Testing" Video <http://www.youtube.com/watch?v=fkSBO9xaqxw>

*Founded in 1954, Tideland Signal Corporation is committed to meeting and exceeding the requirements for marine aids to navigation to the maritime industry.*
