

Tideland Wins Canadian Coast Guard 4 NM Self-Contained LED Marine Lantern Contract

Tideland Signal Canada Ltd., a subsidiary of Tideland Signal Corporation, headquartered in Houston, Texas has been awarded a contract by the Canadian Coast Guard for the supply of self-contained solar-powered marine navigational lanterns.

The contract is the basis of a standing offer for a supply of 1,000 lanterns through the option period ending March 31, 2009.

Tideland will be supplying our SolaLED-140 self-contained LED marine lantern with 6 solar panels. The SolaLED-140 is a member of Tideland's SolaLED series of self-contained solar-powered marine lanterns, which includes various configurations of solar power and lenses to fulfill customer requirements.

The lanterns are fully programmable for power and flash character settings, utilize temperature compensated LED drive circuits to ensure uniform brightness with ambient temperature change, have full monitor and control access and are available in all IALA approved colors. These lanterns incorporate standard 3 and 4 bolt hole mounting patterns thus requiring no special adapter plates for installation.

Tideland continues to light the way forward in providing the latest in LED technologies for marine navigation aids modernization.
