Tideland Signal Pte Ltd Introduces the first GRP Towers for South Thailand

Tideland Signal Pte Ltd, a subsidiary of Tideland Signal Corporation, has won a contract to supply GRP Towers in the Tsunami affected area in the south of Thailand. This contract is the effort of Tideland and our teaming partner, Petrel Technology.

The contract consists of two (2) Lighted GRP Towers and Daymarks. Royal Thai Navy has installed the two Lighted GRP Towers in the Phangnga province – South of Thailand. Since the Tsunami, the Royal Thai Navy has restored some of the Aids to Navigation in that area and further improved the safety for ships operating within the vicinity by placing the two Lighted GRP towers at strategic locations.

“Tideland Signal Pte Ltd has actively supported the Royal Thai Navy with quality Navigational Aids for many years. We are extremely honoured to be given the opportunity to supply the first Lighted GRP Towers for Thailand” says Mr Hor Mun Keong, Vice President – International Marketing for Tideland Signal Pte Ltd.

Ms Prapha Bunyanuparparn of Petrel Technology is grateful to the trust that was placed in her organization by the Royal Thai Navy. She says “Petrel secured the project through excellent support from Tideland Signal and Royal Thai Navy’s willingness to modernise the Aids to Navigation in the country.”
