Tideland Signal Pte Ltd to Supply two Seabeacon 2 System 6 Racons for Vietnam

Tideland Signal Pte Ltd, a subsidiary of Tideland Signal Corporation, has secured a contract to supply two radar beacons (Seabeacon 2 System 6) to Vietnam.

Traditionally, Tideland has had a very good relationship with VMS of Vietnam. When the VMS was split into MSC-1 and MSC-2 for better efficiency in their operation, Tideland was able to maintain the same level of cooperation with the two separate entities.

To further enhance the safety of navigation at sea south of Vietnam, MSC-2 decided to purchase two of the superior Seabeacon 2 System 6 racons to mark the more busy waterways. MSC-2 assisted Tideland in site installation and commissioning of the two thoroughly tested racons. During the site visit, Tideland also conducted training for MSC-2's staff responsible for operating and maintaining the racons.

"We received a lot of support from VMS in the past and this level of support is still being maintained today with MSC-1 and MSC-2. We are very grateful for their confidence in our products and we ensure that they receive the best quality of service from us." Mr Hor Mun Keong, Vice President, International Marketing, Tideland Signal Pte Ltd also commented "These two racons will go a long way in ensuring the safety of navigation in the south of Vietnam, especially during bad weather and rough seas. Tideland is very pleased to contribute to the enhancement of safety at sea in the waters of Vietnam."
